

JANE DOE

Lead Backend Developer | jane.doe@example.com | (123) 456-7890

Professional Summary

Highly experienced Backend Developer specializing in building scalable distributed systems, high-performance microservices, and robust data pipelines. Expert in Python, cloud technologies, and database optimization.

Technical Skills

Languages: Python, Go, SQL, Bash

Frameworks: FastAPI, Flask, gRPC, Django

Databases & Caching: PostgreSQL, Redis, MongoDB, Elasticsearch

Devops & Cloud: Docker, Kubernetes, AWS, CI/CD

Professional Experience

Lead Software Engineer | TechCorp (Jan 2023 - Present)

- Designed and implemented a high-throughput microservices architecture using Python, FastAPI, and gRPC, improving system latency by 35%.
- Built and optimized a distributed caching strategy using Redis, reducing database read loads by 40%.
- Spearheaded migration of legacy monolithic apps to containerized environments using Docker and Kubernetes.
- Mentored 4 junior engineers, establishing coding standards and CI/CD pipelines.

Software Engineer | DataInc (Jun 2020 - Jan 2023)

- Developed and maintained distributed ETL data pipelines using Apache Spark, processing over 10TB of data daily.
- Designed relational schemas and optimized queries in PostgreSQL, achieving a 20% database performance boost.

Education

BS in Computer Science | State University (2016 - 2020)

GPA: 3.8/4.0
